Richardson B. Fatalla

Software QA Engineer — Release Management · System Integration · Multi-Cloud Monitoring

+63 905 268 6425 • rfatalla@gmail.com • linkedin.com/in/richardsonfatalla • Valenzuela City, PH

18 yrs
software testing across monitoring, telecom & embedded

End-to-end
Geneos release owner, from branch cut to GA publish

3 clouds
AWS, Azure & Google Cloud monitoring validation

ISTQB
Certified Tester, Foundation Level (2023)

ISTQB-certified QA Engineer who pairs hands-on testing with release ownership. At ITRS, ships the Geneos monitoring platform from release branch to published binaries, leads the System Integration Testing team's daily stand-ups, and makes sure cloud monitoring reports the right numbers across AWS, Azure and Google Cloud. Works closely with developers so defects are found early and fixed fast.

SKILLS

System Integration Testing · Release Management · Jenkins · AWS · Azure · Google Cloud · Regression · Functional · Smoke & Sanity · API Testing · Load & Stress · Interoperability · Manual & Automated · GitHub PR Reviews · JIRA · TestLink · JMeter · SoapUI · Postman · Bash · C · Linux · Windows · macOS

EXPERIENCE

Quality Assurance Engineer (Mid-level) · *ITRS Group, Philippines* — Sep 2021 – Present

Geneos — enterprise monitoring for on-prem, cloud and containerized environments

- **Release ownership:** run the full Geneos release in Jenkins — cherry-picking fixes, cutting branches and tags, building Alpha and GA binaries, and publishing to the ITRS Resources portal.
- **Team leadership:** lead daily stand-ups for the System Integration Testing (SIT) team.
- **Quality gates:** run integration, functional, regression and smoke tests on Active Console, Gateway and Netprobe before each release iteration; review pull requests before merge.
- **Developer partnership:** work directly with engineers to reproduce, triage and verify fixes.

Cloud Monitoring — AWS, Azure, Google Cloud

- Validate metric accuracy for cloud resources, provisioning and tearing down resources to cover each scenario.
- Verify metrics land correctly in ITRS Analytics; test and deploy products on the AWS and Azure Marketplaces.

Test Development Engineer (Mid-level) · *Rendition Digital International* — Feb 2015 – Aug 2021

- Tested Openet's telecom Policy Manager and Charging System with a globally distributed team.
- Ran interoperability, sanity, API and partial acceptance testing; owned estimation and execution from planning to debugging.
- Daily point of contact for the Openet Manila QA team and manager.

Software Test Engineer — Mar – Dec 2014

Oberthur Technologies

- Load and stress testing on Linux; CPU monitoring under load.
- Shell-scripted VM installs; API and database testing.

Senior Design Engineer — Jul 2008 – Feb 2014

Tsukiden Global Solutions Inc.

- Tested high-performance embedded software from MATLAB and logic specs.
- Built test data and environments; reported defects; coordinated the team.
